CHARGES RAISED IN SELECT AREAS DURING FESTIVALS

Zomato, Swiggy test higher platform fees

ANES HUSSAIN
Bengaluru, September 3

DRIVEN BY DEMAND

Zomato is now levying platform fee of ₹12 and Swiggy ₹12.70 in some locations

Members of Zomato Gold and Swiggy One also pay raised charges

Swiggy first introduced platform fee in April 2023 at ₹2

Zomato started with a fee of ₹3 in August 2023

Both firms raised their platform fees to ₹10 last October

FOOD DELIVERY MAJORS

Zomato and Swiggy have begun experimenting with higher platform fees in select markets, tweaking charges depending on demand patterns, according to industry sources. The flat ₹10 levy that both have imposed since October 2024 is now being tested at ₹12 for Zomato and ₹12.70 for Swiggy in some locations. The additional fee is being collected not only from regular customers but also from paying members of Zomato Gold and Swiggy One, who otherwise enjoy benefits such as free delivery on orders above a certain value.

Sources said that the move is less about immediate revenue and more about testing how far customers are willing to absorb extra charges during peak demand periods, especially festivals and holidays. Zomato, for instance, pushed through a fee increase during Ganesh Chaturthi in Mumbai, while Swiggy carried out similar trials in multiple cities on Independence Day.

The pattern is not unfamiliar. When both firms raised platform fees to ₹10 last October, they initially

described the hike as a festive-season adjustment. But the “temporary” move became permanent, setting a new benchmark for fees that had started modestly just a year earlier.

Swiggy first introduced the charge in April 2023 at ₹2, raising it to ₹5 by April 2024, ₹6 in July, and ₹10 in October. Zomato followed suit in August 2023 with ₹3, bumped it to ₹4 in January 2024 and ₹10 by October. With the latest experiments, customers are now looking at a fivefold jump from the first iteration of the fee.

Restaurants, through industry body National Restaurant Association of

India (NRAI), have largely supported such hikes, arguing that shifting some costs to customers eases the heavy commission burden on eateries. A typical partner restaurant pays out anywhere between 15% and 30% as commission, another 1.8% in payment charges, and 5-10% in promotional costs — amounting to as much as 40% of order value. By making customers pay a small platform fee, delivery companies are seen to be moving towards a more sustainable revenue model.

Zomato and Swiggy did not respond to requests for comments till the time of going to press.

USFDA nod to Lupin injection used in treating schizophrenia

PRESS TRUST OF INDIA
New Delhi, September 3

PHARMA MAJOR LUPIN on Wednesday said it had received approval from the US health regulator for its generic version of risperidone for extended-release injectable suspension, used in the treatment and maintenance of schizophrenia and bipolar disorder in adults.

The approval by the US Food and Drug Administration (USFDA) is for the abbreviated new drug application (ANDA) for risperidone for extended-release injectable suspension, 25 mg per vial, 37.5 mg per vial, and 50 mg per vial, single-dose vials, Lupin said in a regulatory filing. “This is Lupin’s first product using proprietary Nanomi BV’s (Nanomi) technology and has a 180-day CGT (competitive generic therapies) exclusivity,” it added. Nanomi, a Lupin subsidiary, is focused on the development of innovative long-acting injectable (LAI) medicines to improve health outcomes for patients, the company said.

Lupin CEO Vinita Gupta said this is the approval of the first product from the Nanomi LAI platform. “This first-cycle approval is a testament to the capabilities we have established for complex injectables across our teams in R&D, operations and related functions. It

Polymedure to buy 90% in PendraCare

MEDICAL DEVICE MAKER Polymedure on Wednesday said it will acquire 90% stake in the Netherlands-based PendraCare Group from Welling Holdings BV at an enterprise value of ₹188.5 crore. The company has signed definitive agreements to acquire the stake in PendraCare Group. The balance 10% stake will be acquired in 2030 on the basis of 2029 Ebitda, it said. —PTI

Telexcell to acquire 25% in Welcure

WELCURE DRUGS & Pharmaceuticals on Wednesday said that Singapore-based Telexcell Trade has offered to acquire up to 25% equity stake in the company at an indicative price of ₹20 per share. This strategic investment is aimed at enhancing Welcure’s global footprint. The proposed all-cash investment, estimated to be around ₹52 crore, is subject to due diligence. —PTI

validates our platform capabilities at Nanomi and underscores our commitment to complex injectables for patients globally,” she added.

Gupta further said, “As we execute on our strategy to evolve speciality/novel products, we plan to leverage the Nanomi platform for novel long-acting injectables that meet unmet patient needs”.

Nanomi’s LAI platform has demonstrated efficacy and safety in drug delivery. The medicine had estimated annual sales of ₹190 million in the US, Lupin said.

products in development or on the market that would benefit from longer-acting formulations, the company said.

Risperidone for extended-release injectable suspension is bioequivalent to the reference listed drug Risperdal Consta long-acting injection, and is indicated for the treatment of schizophrenia and as monotherapy or as adjunctive therapy to lithium or valproate for the maintenance treatment of bipolar disorder. The medicine had estimated annual sales of ₹190 million in the US, Lupin said.

Polymatech seeks tax holiday for chip push

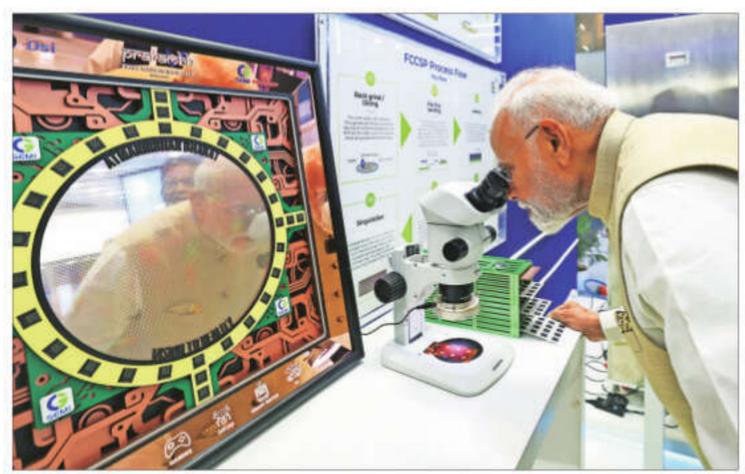

Industry needs uninterrupted power supply & robust infra: CEO

OJASVI GUPTA
New Delhi, September 3

CHENNAI-BASED POLYMAT-
ECH ELECTRONICS has urged the government to grant income and corporate tax holidays for the semiconductor sector, arguing that fiscal relief, rather than subsidies, will give the industry long-term momentum.

“We are not seeking taxpayer money. Instead, we request a 10-year tax holiday and removal of import duties on machinery and raw materials,” Eswara Rao Nandam, CEO of Polymatech Electronics, said at the ongoing Semicon India 2025 exhibition here.

He noted that several countries had provided similar support to semiconductor companies. Pointing to the US as an

Prime Minister Narendra Modi at the Semicon India exhibition in New Delhi on Wednesday

example, Nandam said tax breaks under the Joe Biden administration helped the industry, while their rollback during the Donald Trump presidency pushed over 120 firms into bankruptcy. “Your business should generate your

money, you should not depend on someone else’s,” he said.

Nandam added that the industry also needs robust infrastructure, including uninterrupted power supply and gas systems. While welcoming the commerce ministry’s

relaxation of Special Economic Zone (SEZ) rules reducing minimum land requirement for electronics units from 50 hectares to 10, he said that zero income tax would be “the icing on the cake”.

At its Chennai facility, Poly-

matech Electronics operates a “dark factory,” an automated plant run by robots. Nandam stressed that the move was not about cutting costs but building advanced capabilities. “This creates a large number of white-collar jobs,” he said.

Founded in 2018 with revenues of just ₹14 crore, Polymatech Electronics expects to close FY25 with nearly ₹2,000 crore in turnover. The company is investing ₹1,143 crore in Chhattisgarh’s first advanced semiconductor unit at Lava Raipur, focused on Gallium nitride (GaN) chips, which are crucial for powering 5G and future 6G networks.

Its exports span the US, the UK and West Asia, with applications ranging from medical devices and agriculture to lighting, laptops and mobile backlights. “Polymatech is exploring acquisitions and partnerships to expand globally. The GaN plant is a significant milestone in building competitiveness and strengthening manufacturing capabilities,” Nandam said.

JSW Cement to slash cost by ₹400/tonne in 2 years: CEO

URVI MALVANIA
Mumbai, September 3

JSW CEMENT IS sharpening its focus on cost efficiencies, aiming to pare down expenses by ₹400 per tonne over the next two years, the firm’s management said during an earnings call on Wednesday.

JSW Cement executives added that nearly half of this target has already been achieved through measures such as optimising logistics, shifting to renewable energy, expanding the use of alternative fuels, and increasing the share of premium products.

“We have a lot of focus on cost reduction. Substantial chunk of it has already been achieved, and additional savings will translate into stronger margins,” chief executive Nilesh Narwekar said at the call after the FY26 first-quarter results.

These efforts, he added, are designed not just to support profitability in a volatile fuel environment but also to consolidate JSW Cement’s position as the lowest-emission producer in India and globally, with CO2 intensity of 277kg per tonne. The company also addressed the potential impact of a cut in the goods and ser-

vices tax (GST) on cement. A reduction from the current 28% slab to 18% could lower the absolute value of incentives that states extend, since these are linked to net GST outgo.

However, Narwekar clarified that timelines for such benefits will remain unchanged. “Everyone will be governed by the policy under which they have invested. While the absolute number may drop, the benefits will continue for the balance life of the policy.”

Expansion remains central to JSW Cement’s growth strategy. The company has set its sights on reaching 34 million

tonne annual capacity by 2028, with immediate additions at Sambalpur (Odisha) and Nagaur (Rajasthan). The Sambalpur grinding unit is slated for commissioning this month, while Nagaur’s integrated plant will come onstream within the current financial year.

Entry into North India is particularly significant, with management highlighting that the region’s trade-heavy market will help lift JSW Cement’s retail mix from 52% to about 55-60%. Over the longer term, the company expects new capacity to diversify geographic risk and capture incremental demand from infrastructure and housing.

On the industry environment, JSW Cement struck a confident note despite near-term challenges. Demand is projected to grow 6.5-7.5% in FY26, aided by government spending on infrastructure. Fuel costs, however, are emerging as a pressure point, with imported pet coke prices inching up from \$105 to \$115 per tonne. Prices in key markets are largely holding firm, with only a marginal dip during the monsoon, and the festive season is expected to provide further support.

Green nod to Vedanta bauxite mines on hold

THE UNION ENVIRONMENT ministry has deferred a decision on Vedanta’s proposal to divert over 700 hectares of forest land in Odisha’s Rayagada and Kalahandi districts for the Sijimali Bauxite Mines, citing unresolved issues over community consent, compensatory afforestation and ecological risks, official records show.

The proposal, taken up at the forest advisory committee’s meeting on August 25, seeks diversion of 564.58 hectares in the Rayagada forest division and 143.62 hectares in the Kalahandi (South) division from a total leasehold area of 1,548.78 hectares. Vedanta was declared the preferred bidder for the block in a March 2023 auction and plans to mine nine million tonne of bauxite annually for 31 years. The block is estimated to hold 31.1 million tonne of reserves. According to the proposal, the

mine is needed to partly meet the raw material demand of its alumina refinery at Lanjigarh, which operates at six million tonne per annum capacity. The project also involves the displacement of 100 families from Malipadar in Rayagada and Tijamali in Kalahandi.

The FAC noted that Odisha had submitted reports from the district collectors certifying due procedure

in obtaining gram sabha resolutions under the Forest Rights Act. However, the committee said the reports did not address concerns raised by villagers and petitioners before the Orissa High Court, according to the minutes of the meeting.

In March this year, the court recorded allegations that gram sabha resolutions in support of mining were “fraudulently” obtained, while subsequent Gram Sabhas in 2024 opposed forest diversion. —PTI

Notice of the 14th Annual General Meeting of BEW Engineering Limited and Information on Remote E-voting

NOTICE calling the 14th Annual General Meeting (“AGM”) of the Members of BEW Engineering Limited (“Company”) schedule to be held on **Wednesday, September 24, 2025 at 03:00 P.M (IST)**, in compliance with the Ministry of Corporate Affairs (“MCA”) has, vide its General Circular dated September 19, 2024 read together with circulars dated April 8, 2020, April 13, 2020, May 5, 2020, January 13, 2021, December 8, 2021, December 14, 2021, May 5, 2022, December 28, 2022 and September 25, 2023 (collectively referred to as “MCA Circulars”), permitted convening the Annual General Meeting (“AGM” / “Meeting”) through Video Conferencing (“VC”) or Other Audio Visual Means (“OAVM”), without physical presence of the member at a common venue. In accordance with the MCA Circulars and applicable provisions of the Companies Act, 2013 (“Act”) read with Rules made thereunder and the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 (“Listing Regulations”), the AGM of the Company is being held through VC / OAVM. The deemed venue for the AGM shall be the registered office of the Company i.e. FE-10, M.I.D.C. Industrial Area, Phase II, Manpada Road, Dombivli (East) District Thane, Maharashtra 421204.

The Notice of the AGM and Annual Report 2024-25, have been sent to all the members whose email IDs are registered with Depository Participants on **2 September, 2025**. These documents are also available on the website of the Company at <https://www.bewtd.com/Annual-Report.html> and the websites of the Exchange i.e. National Stock Exchange of India Limited www.nseindia.com. Shareholders holding shares as on the cut-off date i.e., as on **Wednesday, September 17, 2025**, may cast their vote electronically on the business as set forth in the Notice through the electronic voting system of Bigshare (“remote e-voting”). Shareholders participating through the VC facility shall be reckoned for the purpose of quorum pursuant to Section 103 of Companies Act, 2013.

All the Shareholder are informed that

- The business as set forth in the Notice of the AGM may be transacted through remote e-voting at the AGM.
- The cut-off date for determine the eligibility to vote by remote e-voting or by e-voting at the AGM shall be **Wednesday, September 17, 2025**.
- The remote e-voting shall commence on **Sunday, September 21, 2025 at 09:00 AM (IST) and end on Tuesday, September 23, 2025 at 05:00 PM (IST)** and thereafter Remote E-voting will be disabled by Bigshare.
- Any person, who acquires shares of the Company and becomes member of the Company after sending the Notice of AGM and holding shares as the cut-off date, may obtain the login ID and password by sending a request at ivote@bigshareonline.com or call us at: 1800 222 54 22.

Members may note that:

- Once the vote on a resolution is cast by the member, the member shall not be allowed to change its subsequently;
- The facility for voting will also be made available during the AGM, and those members present in the AGM through VC facility, who have not cast their vote on the resolutions through remote e-voting, are otherwise not barred from doing so, shall be eligible to vote through the e-voting during the AGM;
- The members who have cast their votes by remote e-voting prior to the AGM may also attend the AGM but shall not be entitled to cast their votes again;

- The manner of voting remotely for members holding shares in dematerialized mode and for shareholders who have not registered their email address is provided in the Notice of the AGM.
- In case shareholders’ investor have any queries regarding virtual meeting, you may refer the Frequently Asked Questions (“FAQs”) available at <https://ivote.bigshareonline.com>, under download section.
- In case of any queries or grievances pertaining to the e-voting procedure, shareholders may get in touch with the following:

FROM THE FRONT PAGE

2-tier GST regime from Sept 22

INVERTED DUTY STRUCTURES that have inflated the costs of units in various sectors, including employment-intensive ones, have been corrected to a large extent too.

Amid a cyclical economic slowdown and in the face of US tariffs, the council’s decision, taken at the behest of the Union government, will be helpful to medium, small, and micro enterprises (MSMEs) and the farming sector.

The Council also approved measures to ease the burden of compliance on businesses. These include reduction of registration time for MSMEs and startups from 30 to just three days. A proposal for time-bound automated GST refunds for exporters was also cleared, sources said.

According to official estimates, the revenue loss on account of the slab rejig could be around ₹93,000 a year, but sin goods moving from the 28% slab to 40% will fetch around ₹45,000 crore extra.

The slabs reset mostly follows a principle that everyday use items and goods and services consumed by the common people ought to attract lower levies, while high-end

KEY DECISIONS

All TV sets, washing machines, air conditioners, cement to move from 28% to 18%

FMCG goods, food items to move from 5% to 5%, 12%/18% to nil

Compensation cess to go, once relevant loans repaid by October

Health and life insurance policies of individuals exempt

Tax on man-made fibre reduced to 5%, in big boost to textile units

Tax relief for 36 cancer and blood disorder drugs

products could be under higher rates. These norms are applied to products like garments and automobiles.

While the Council meeting was scheduled for two days, including on Wednesday, it was dispersed, with the agenda being concluded.

Earlier in the day, finance ministers of eight Opposition-ruled states, met here and decided to press their demand that all states be compensated for the likely revenue loss from the reforms. These states are Himachal Pradesh, Jharkhand, Karnataka, Kerala, Punjab,

Tamil Nadu, Telangana and West Bengal.

“If the Centre agrees to compensate us for whatever loss we would incur, then we have no issues in approving the agenda,” Jharkhand finance minister Radha Krishna Kishore said after a breakfast meeting of the ministers of these states. Kishore said his state might suffer an annual revenue loss of ₹2,000 crore due to the rate cuts, while Kerala finance minister KN Balagopal said his state might incur loss of around ₹8,000 crore.
